

## **Streaming Colour Studios to Release *LandFormer***

**New iPhone/iPod touch Game Available on the App Store June 29, 2010**

FOR IMMEDIATE RELEASE

GUELPH, ON - June 22, 2010 - Streaming Colour Studios today announced that their third game, *LandFormer*, will be available June 29, 2010 exclusively for iPhone and iPod touch. *LandFormer* is a unique and challenging new game in which players raise and lower terrain in order to solve puzzles.

Each level in *LandFormer* is made up of 25 land tiles of different heights. Using the provided tools, players raise or lower the tiles to flatten the board. If it sounds simple, it is ... and it isn't. Players will need a keen eye, intuition, and skill to complete the most advanced levels. For players who want to enjoy the game with friends, a level editor and sharing system allows players to send their own levels to their friends via email.

"*LandFormer* was born out of a prototype I created for a game jam at the 360|iDev conference in September, 2009," said Owen Goss, founder of Streaming Colour Studios. "What started with that simple prototype grew into my most ambitious project to date. *LandFormer* ships with a built-in level editor, the ability to share levels with your friends, and an in-app store where players can purchase additional levels and themes."

The game is a free download and ships with 10 beginner levels, but Goss said that at launch an additional 50 levels are available in the in-app store for purchase. "The game ships with the 'Earth' theme you see in most of the screenshots," said Goss, "but at launch users will be able to purchase the 'Discotheque' theme if they'd prefer to play with a more colorful, abstract look." Streaming Colour plans to release more level packs and themes in the future.

*LandFormer* will be available as a free download on June 29, 2010. *LandFormer* will be available world-wide from Apple's App Store for iPhone and iPod touch.
